

Dream Tree POWER PITCHER

Enjoy the many benefits of the *Power Pitcher* like added hydrogen to remove free radicals, supplied minerals to create alkaline water that supports your metabolism, smaller water clusters that are more quickly absorbed, and an improved taste.

The filters are filled with Magnesium Balls, Tourmaline Ceramic Balls, Activated Carbon, Antibacterial Ceramic Balls, and Magnetite for health & purity.

Assembly

1. Place *Filter A* into the basin of the pitcher lid.
2. Ensure that the 2 nodules (2a) on the base of *Filter A* emerge from any 2 holes on the base of the pitcher lid (2b) or proper filtration will not occur.
3. *Filter B* attaches to the pitcher lid from the base.
4. Align the tabs of *Filter B* with the spaces between the tabs of the pitcher lid and twist in a clockwise motion until there is a firm connection or click.
5. Slide the pitcher lid into the pitcher body. It is now ready for use.

Initial Activation (REQUIRED)

1. Place both parts of the filter into the pitcher and cover with a 30% vinegar 70% water mix.
2. Swirl the pitcher for 5 to 10 minutes so the water turns a milky white color.
3. Pour out the vinegar mixture and clean the filters well by rinsing in running water 2 or 3 times.
4. Assemble the pitcher and pour in purified water. If desired, check the new pH and ORP levels.

Maintenance
