

DT PRODUCT GUIDE

The PREMIUM PURE-ALKA WATER PURIFIER & ALKALINE-ANTIOXIDANT SYSTEM was designed with simplicity in mind. It can be set up easily, by anyone, without any special tools or skills. PREMIUM PURE-ALKA filters your water naturally in a small, lightweight design that can be handled easily—plus, maintenance is a breeze with our economical filters.

The Premium Pure-Alka offers a high dose of antioxidants for optimal health. This natural filtration system is capable of producing an ORP as potent as -150. Made with activated carbon to absorb and remove chlorine and other impurities, and ceramics to remove microbes and eliminate odors, the Premium Pure-Alka can store water for long periods and maintain freshness.

The PREMIUM PURE-ALKA SYSTEM is a four-stage process that delivers the ultimate purified, antioxidant-alkaline water:

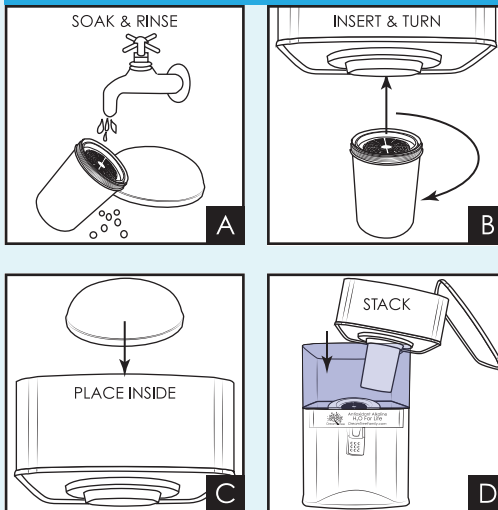

- Stage 1: An ultra accurate (0.2µ pore), multi-porous ceramic filter that removes rust, sediment, dirt, & other solids.
- Stage 2: A mixture of ceramic dechlorination and antifungal-sterilization balls in coconut shell activated carbon.
- Stage 3: A multi-step filter made of a granular zeolite layer for ion exchange, a silicon layer for capturing organic matter, and a complex quartz filtration layer with more than 45 kinds of minerals.
- Stage 4: Alkaline-antioxidant ceramic balls composed of alkali and reduction-catalyst materials.

ASSEMBLY DETAILS

Your new PREMIUM PURE-ALKA WATER PURIFIER & ALKALINE-ANTIOXIDANT SYSTEM is an attractive countertop solution that is ideal for any kitchen decor, and it's so easy to set up and maintain—anyone can do it!

PARTS DIAGRAM

ASSEMBLY GUIDE

- 1 Remove Ceramic Filter and Cartridge Filter from packaging and soak in water for 3 minutes & rinse thoroughly under running water. *detail A*
- 2 Securely screw the Cartridge Filter into the threads of the underside of the Upper Water Tank. *detail B*
- 3 Place the Ceramic Filter inside the base of the Upper Water Tank. *detail C*
- 4 After your Alka-Fresh Disk has been activated*, place it anywhere along the bottom of the Purified Water Tank—there is no special placement.
- 5 Stack the components according to the parts diagram. *detail D*
- 6 Fill the Upper Water Tank to the indicator line and let it to pass through the system into the Purified Water Tank. Your water is ready to enjoy!

ACTIVATION, & FILTER MAINTENANCE GUIDE

*Alka-Fresh Disk Activation:

- 1 In a tall, clear container, mix 3 oz. white vinegar with 7 oz. tap water.
- 2 Immerse into the vinegar and water solution.
- 3 Stir (or shake) for 3 minutes ONLY. The solution should foam and bubble.
NOTE: If you leave the Alka-Fresh Disk in longer than 3 minutes, it will destroy the ceramic balls.
- 4 Take out and rinse (must be rinsed under strong water pressure) for 3-5 minutes, making sure that all of the vinegar residue is gone.
- 5 Refresh every 3 weeks in vinegar solution for only 2 minutes.
- 6 Once activated, your Alka-Fresh Disk must remain in water at all times.

Filter Specifications

Ceramic Filter: As you use your Premium Pure-Alka System, you will notice surface discoloration—most likely, dark brown from rust. Simply wipe off the surface staining with a clean sponge or rough cloth to remove particulate buildup. Change your Ceramic Filter every 6 to 12 months depending on water quality and usage.

Cartridge Filter: Change your Cartridge Filter every 6 to 12 months depending on water quality and usage. The Cartridge Filter is capable of purifying up to 5000 liters.
