

# **ROCCS Unit Filter Replacement Schedule**

Whenever a new filter is added to the unit, you must run water through that new filter for several minutes to flush any particles that may have been jarred loose during shipping.

The ROCCS requires professional installation by a licensed plumber, but once installed, is quite easy to maintain. Because the ROCCS is a high-caliber system, it must be properly maintained. The filter replacement schedule is in your manual, in your back office shopping cart under “Instructions/Activation” or see schedule below.

We recommend the ROCCS be placed in an area that is readily accessible so it will be easy to change the filters. When you change the filters, please remember to turn off your water supply and expect a little water to leak out of the filter you are changing.

We highly recommend utilizing the ROCCS Autoship maintenance program that is available to all Dream Tree Family Members and their registered customers.

Knowing when to change your filters is simple if you have chosen the “Autoship Replacement Filter Program”- Autoship is \$29.95 monthly & includes FREE SHIPPING. When you receive a filter it means it’s time to change it.

## **The shipping schedule is as follows:**

**Filter #1 (Sediment Filter) – Up to 3 Months**

**Filter #2 (2 Carbon Block Filters) – Up to 6 Months**

**Filter #3 (Antioxidant Filter) – Up to 6 Months**

**Filter #4 (TFC-Taste and Odor Filter) – Up to 6 Months**

**Filter #5 (Membrane Filter) – Up to 2 years**
