

TWP 3000 WATER FILTRATION SYSTEM

Now that you have purchased the Dream Tree TWP 3000 drinking water filter you have taken the first step towards protecting you and your family from the dangers of water borne contaminants. To install your device, please follow these instructions.

COMPLETED SETUP

ASSEMBLY

PARTS

The above are included inside the box of your TWP 3000 WATER FILTRATION SYSTEM:

INSTALLATION, ACTIVATION, & MAINTENANCE

INSTALLATION

- 1 Remove faucet aerator by turning counterclockwise—pliers may be needed
- 2 Screw diverter valve in place of aerator. (*Note: If valve doesn't fit, adaptor from local hardware store will be needed—usually costs less than \$3.*)
- 3 Attach base legs to filter cartridge by sliding over filter unit—slight pressure is required.
- 4 Screw square coupler into **INTAKE** end of filter cartridge. (*Note: Filter cartridge has arrows that display direction of water flow.*)
- 5 Screw elbow coupler into **DISPENSING** end of filter cartridge.

6 Slide one end of tubing on to diverter valve and connect other end to square coupler at intake side of filter.

7 Push water spout into elbow coupler at dispensing end of filter.

ACTIVATION

Before first use, run cold water for 5 minutes through filter to flush filter cartridge. You will notice a delay as filter fills up. Water will be black for first few minutes as it flushes loose carbon.

MAINTENANCE

After approximately three years, replace filter cartridge by detaching elbow and square couplers and reattaching to new filter.

Should you have difficulty or questions about the installations, please do not hesitate to call us toll free at 1-888-618-5950. Thank you for purchasing the Dream Tree TWP 3000 Water Purifier. Enjoy pure, great tasting water for years to come.
